Formation of INC (1885) Partition of Bengal (1905) Home Rule Movement

Grandhas Era (1917-47) - Champa - Non-Coop 1938 Civil Disobedience

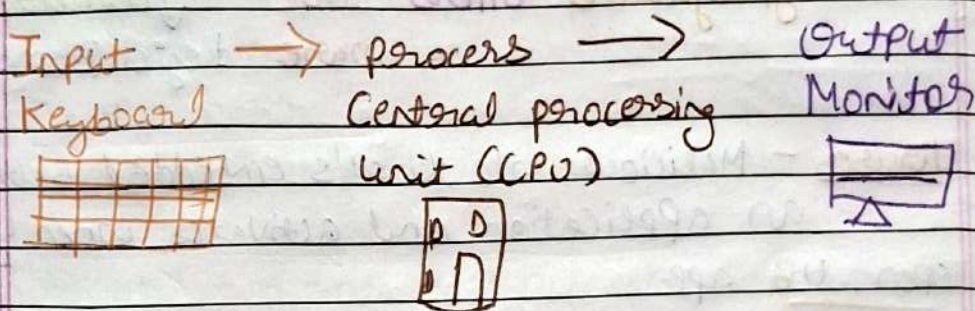

Quit India 1942 Rise of INA 1942 Revolutionary activities 1942 1947: Independence & Partition

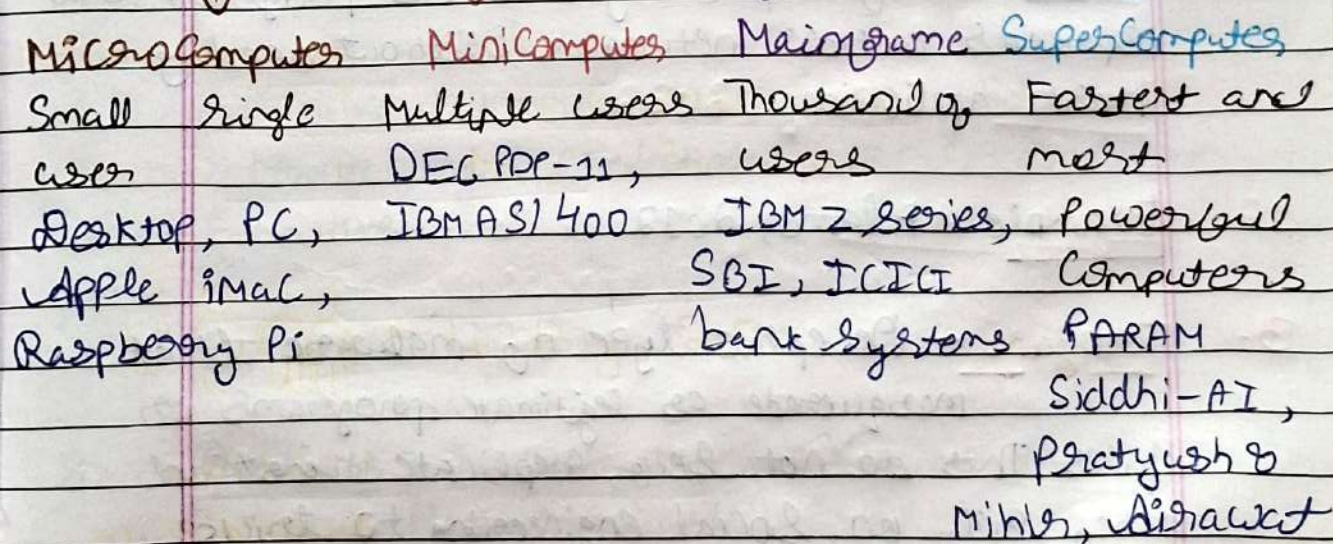

Basic Computer terminology -

Computer - An electronic device that accepts data, processes it, stores it and produces output.

IPO Cycle -

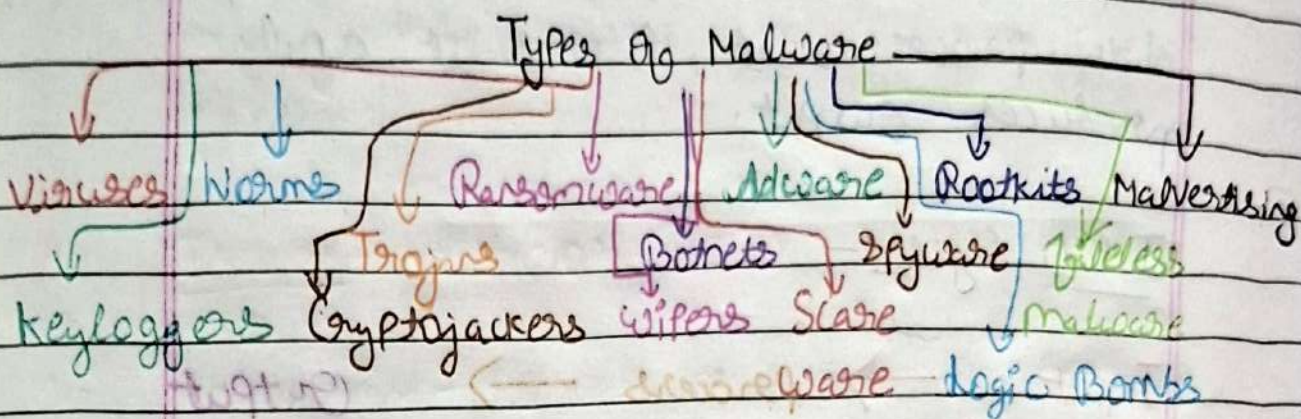

Types of Computers

Cybersecurity - To protect users and organizations from cyber threats like malwares.

Malware - Program, code or file designed to disrupt, damage or steal data.

1. Viruses - Malicious code that's embedded within an application and activates when you open the app.

Example - Melissa Virus, 1999

2. Worms - Self replicating malicious program that spreads across networks without needing a host application.

Example - Flame, 2012

3. Trojans - Deceptive type of malware that masquerade as legitimate programs or files. This do not self replicate, instead they rely on social engineering to trick victims.

Example - Antidote, 2004

locks their device, demanding payment for access or decryption.

Example - Nannacy, 2017

5. Botnets - Network of infected computers that hackers control remotely. Use device to flood servers with traffic resulting in IP addresses being blocked or flagged.

Example - Emotet, 2014

6. Adware - displays unwanted advertisements while tracking browsing activities.

Example - Fireball, 2017

7. Spyware - Secretly infiltrates device to monitor internet activity, capture internet login credentials, and collect sensitive

Example - LightSpy, 2020

8. Rootkits - Infiltrate devices at the Operating System level, giving cybercriminals full, remote control of computer or phone.

Example - Zachlo, 2012

9. Fileless Malware - Operates without leaving traditional files on a system. Instead it exploits legitimate tools, like system memory or in-built processes, to execute malicious code.

Example - Astaroth, 2019

10. Malvertising - Spreads malicious code through deceptive ads containing hidden threats like injected images, cookies, or scripts.

Example - The Media, 2016

11. Keyloggers - Special type of spyware that record everything you type on your website or device.

Example - Svpeng, 2022

12. Cryptojackers - Hijacks a computer's resources to mine cryptocurrency for cybercriminals.

Example - Abstractionism, 2022

13. Wipers - Permanently delete data from infected devices.

Example - AcidPower, 2024

24. Scareware - Deceive users into thinking their device is infected with viruses or threats.

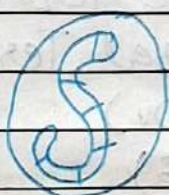

Example - Fake Antivirus, 2018

15. Logic Bombs - Lie dormant until the user meets specific trigger conditions.

Example - Logic Bombs, 2019

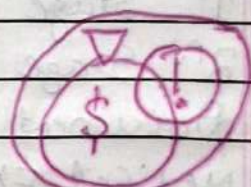

Viruses

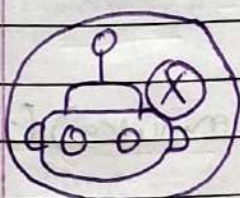

Worms

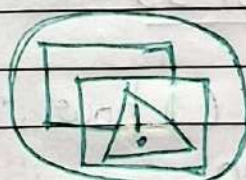

Trojans
